 --> Comment Text :

As a citizen of Nevada, the United States, and the World, I am opposed to the use of nuclear energy and the transport of nuclear waste to the state of Nevada. The communities allowing the production of nuclear energy should be responsible for the waste products they produce. Perhaps they would rethink allowing such a dangerous industry to flourish in their neighborhoods. Yucca Mountain has not been shown to be a safe place for nuclear waste storage. The transport of nuclear waste has not been shown to be safe. The idea of "send it to Nevada and poison the least densely populated area" is insane and deeply flawed. Please, do not trade a dangerous situation for a more dangerous situation.

I urge you to shut down the nuclear reactors, support funding for renewable energy, and research safer options for the existing nuclear waste.
